

Top 5 Reasons to Choose Kerio MailServer over Zimbra

Kerio MailServer has ...

1. Richer cross-platform collaboration features

- Native Microsoft Entourage support
- Richer Microsoft Outlook support
- Mature CalDAV implementation
- Public folder access in web interface
- Free/busy between iCal, Entourage and Outlook

2. Easier deployment and administration

- Installs in minutes
- Works out of the box
- One administration console for all components
- Self-contained services
- Lower hardware resource requirements

3. Led in Exchange alternative awards and reviews

- Winner of international product comparisons
- Only alternative with native Entourage groupware
- Easy-to-use Exchange migration tool

4. Stronger and more flexible email security

- More anti-spam layers
- Integrated commercial anti-virus
- Dual anti-virus engine option

5. A perpetual license

Reviews

"Excellent. Kerio MailServer is the only vendor to offer a complete cross-platform solution, supporting multiple protocols, working with CalDAV and iPhone."
Norbert Graf
Linux Magazine

"Kerio MailServer offers advanced anti-spam and anti-virus features, comprehensive connectivity, and strong mobile email support."
Jürgen Heyer
Internet Magazine

"Kerio MailServer was easier to use, less expensive, and provided more functionality than other products and provided the integration with Active Directory"
Akis Fotakelis
Windows IT Pro
